

SHOWCASE

Red Bull Air Race – Berlin, Germany

The Red Bull Air Race World Series is an international series of air races, in which competitors fly against the clock through a series of gates while performing stunning aerobatics. For the first time the Red Bull Air Race took place in Germany, where the event attracted more than 600,000 visitors with its spectacular air show.

As one of the sponsors of the After-Race-Party in the evening, Traxon installed an unconventional backdrop of Tile 64PXL Wash panels on the stage. In tune with the DJ's vibe, the dynamic panel light show heated up the show for a nightlong party. Controlled by DMX technology, the panels allowed for the creation of a broad range of different colors and spectacular color changing effects in synch with the music, and turned the After-Race-Party into a unique event.
