Normann Copenhagen introduces Norm 03 designed by Britt Kornum

Norm 03 is a modern lamp shade kit in 39 pcs. It is designed with organic and simple principles in mind. When lit, Norm 03 provides a sculptural light effect on your wall.

The Norm 03 lamp shade originally took shape in Britt Kornum's hands and was hung above her dining table. After much encouragement from her friends and acquaintances, Britt eventually contacted Normann Copenhagen.

Normann Copenhagen fell for the shade straight away, thanks to its organic and very alive-looking form. When the lamp is turned on, it casts a shadow on the ceiling that reinforces the 'alive' impression. Two long foil strips fold in and out of each other in a snake-like pattern, creating, in their own way, order from chaos.

Britt Kornum

Norm 03 kindles refresh memories of the sixties, and that story attracted Normann Copenhagen. Norm 03 is a self-assembled product that is easy and straightforward to use. No tools or glue required.

Norm 03 is supplied in a flat pack without a socket or electrical parts, so it is compatible with any electrical standards around the world.

In 2003, Norm 03 was awarded the Formland Award, and in 2004, it was nominated in the 'Best Item' category at Imm Cologne.

Material: lamp shade foil

Colours: white

Price:

Small 53 x 32cm Euro 100,-, \$ 134, Large 65 x h40cm Euro 145,-, \$ 200

Normann Copenhagen launched their first product, the lamp Norm 69, in 2002. A series of exciting and bold design products have been designed since then. Rewarded with international design awards, Normann Copenhagen continues developing designs that challenge conventional thinking and make normal objects extraordinary through good design.
