The re-edition of the 1967s lamp
by Joe Colombo

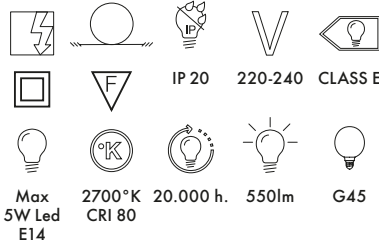

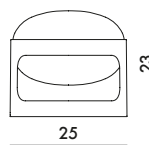

Joe Colombo's KD28 re-edition

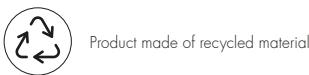

KD28 1967
Design Joe Colombo

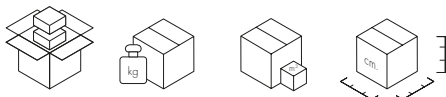

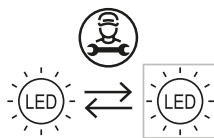

9485

MATERIAL
Recycled PMMA

- The KD28 lamp by Joe Colombo retains its original 1967 design, reinterpreted with recycled materials and contemporary lighting solutions.
- The structure remains faithful to the historic proportions, while the dome-shaped diffuser now features a matte finish that ensures a softer, more even light distribution, enhancing visual comfort.
- Special attention is given to the details, such as the fabric-covered power cable, which is perfectly color-coordinated with the base, adding a refined technical touch.

 Package of 4 wheels

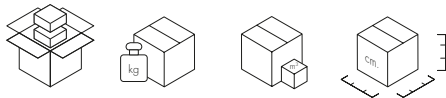

MATERIAL

 Batch-dyed or painted ABS

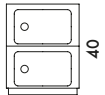

- The round version of the Componibili with a 42 cm diameter is now presented in a renewed form, the result of a new industrial mold that enhances both its quality and aesthetic appeal.
- The color range has been expanded to include shades already available in the 32 cm version, as well as new tones that blend a contemporary spirit with historical references.
- The new version is available in 2- and 3-element configurations, with non-separable compartments—a technical evolution that further enhances this catalog classic.

TEATIME 2023
Design Philippe Starck

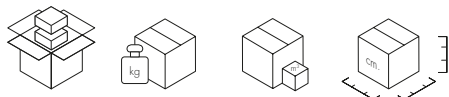

1965

MATERIAL
Recycled and metallized PMMA

A NEW ECO FRIENDLY RECYCLED MATERIAL
Kartell is using recycled PMMA in its transparent productions for the first time. Teatime is the first product made from this material, which originates largely from the depolymerisation of plastic waste from various sources. This material retains aesthetic quality and structural requirements comparable to pure new material; this project makes it possible to give industrial plastic waste a new lease of life and turn it into new products that will stand the test of time and become design icons.
